HD SaaS® | Enterprise Desktop

Move your workplace to the cloud with a hosted virtual desktop from HD SaaS!

HD SaaS | Enterprise Desktop

HD SaaS® | Enterprise Desktop is a hosted virtual workplace with anywhere access to applications and data. It is an innovative method for delivering managed desktops to end users. A virtual desktop hosted by HD SaaS looks and behaves like a regular Windows 7 desktop PC, but software and data are securely hosted off-site. Users access their hosted desktop securely over an encrypted Internet connection from a PC, MAC, laptop, netbook or iPad.

Virtual Office

The on-demand HD SaaS | Enterprise Desktop service is available 24x7x365, so customers can access their workplace when they need it, where they need it. Whether at home, at a client's, an Internet café or any desk in the office, the way users connect to their *virtual office* is always the same.

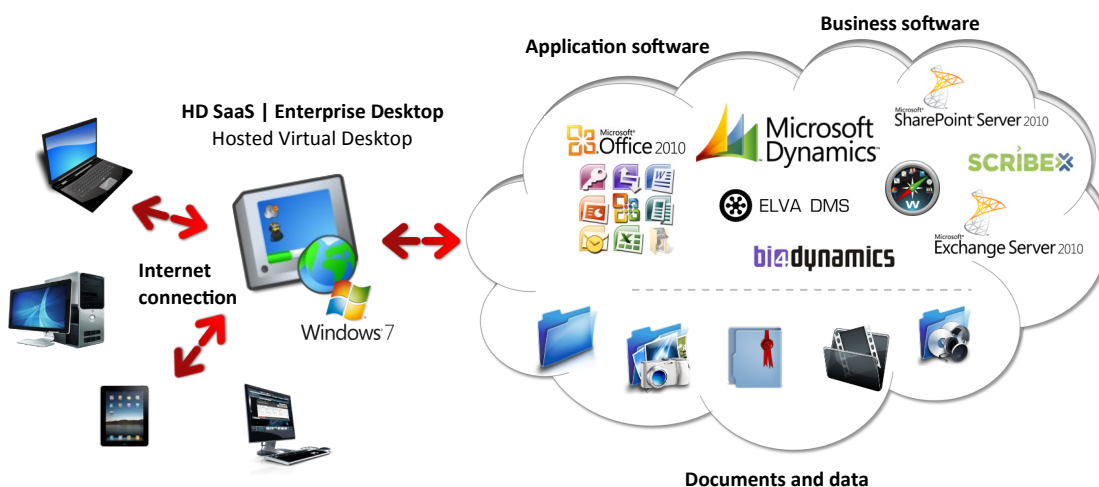

Focus on core business

In-house IT spends most of their time and budget maintaining existing hardware and software. With hosted virtual desktops, HD SaaS IT experts do the time-consuming tasks, while businesses can put the precious resources to work on critical strategic issues.

What is a hosted or virtual desktop?

Hosted virtual desktop (HVD) is a product that truly brings out the power and simplicity of "cloud computing". It is commonly a browser-based connection to a Microsoft Windows® desktop that includes an office productivity suite such as Microsoft® Office alongside other desktop applications. The desktops and users' data are hosted, run, delivered and supported from a central location, usually a secure data center with high-quality, resilient connections to the "cloud".

The move towards HVDs is accelerating as Microsoft and Google have both entered and backed the "cloud", as has the evolution of new licensing schemes, which allows fees to be based on a subscription rather than purchase.

How it works

- ✓ Accessing the desktop workplace is as simple as logging into an Internet browser.
- ✓ All business and HD SaaS applications, personal documents, company files and data feel just like sitting at a desktop PC, with the elegant look and feel of Windows 7. Other software, such as freeware and additional services, is delivered to users in minutes via automatic provisioning and user management.
- ✓ HD SaaS | Enterprise Desktop allows offline fine synchronization with local computers and stores all documents online. Even if customers' Internet connection goes down, all files will still be safely stored and accessible in the virtual workplace.
- ✓ Desktop and all customer data is delivered from a secure data center. After login users are transferred to a safe HTTPS environment.

Worldwide HVD revenue will grow from about \$1.3 billion to \$1.5 billion in 2009, which is less than 1 percent of the worldwide professional PC market, to \$65.7 billion in 2013, which will be equal to more than 40 percent of the worldwide professional PC market.

(Gartner, March 2009)

do IT differently!

HD SaaS | Enterprise Desktop service benefits

Powerful

- Easy transition from a desktop PC to a virtual workplace
- Offline file synchronization and plenty of storage
- Cloud computing without the need to build on-premise VDI (Server-Based Computing)

Predictable IT expenses

- Low computing requirements
- No need for servers and a large support staff for in-house IT maintenance
- Transparent monthly costs based on the rate of use
- Immediate savings through reductions in capital costs, power, management and other associated costs, which tend to add up even in smaller companies

Enhanced security

- Virtual desktop data are hosted in a secure data center, fully ISO 27001 compliant for information security
- Access via safe Citrix connection sessions
- Safeguard of important and sensitive information in case of a stolen laptop or broken PC
- Firewall, antivirus and anti-spam protection
- Additional data safety via allowed application white list

Reliability

- Systems load balancing across multiple servers, so that hardware failures do not stop everyday work
- High 99.9% availability platform based on Hyper-V™ cluster, HP BladeSystem and HP StorageWorks EVA systems
- Full platform and services performance and availability monitoring 24x7 with automatic recovery and optimization tasks
- Two-tier back-up system with Microsoft® System Center Data Protection Manager (twice per day to disks, weekly to tape library)
- Fully automated maintenance (Microsoft® updates, software distribution, software and hardware inventory, configuration management)

Software applications available with HD SaaS | Enterprise Desktop

HD SaaS portfolio

All HD SaaS services are available via HD SaaS | Enterprise Desktop. HD SaaS hosted virtual desktop is the only way to access HD SaaS | Microsoft Dynamics ERP and HD SaaS | Microsoft Office as hosted services.

Other application software and integration

What if applications you use every day are not on the list? HD SaaS | Enterprise Desktop comes pre-packed with basic Windows apps, codecs and other IT essentials. Any application or legacy system necessary for everyday work can be delivered to users in a centralized way.

As an environment, HD SaaS hosted virtual desktop ties together and enables Microsoft integration features built into many software solutions, but often left underutilized. Active Directory® integration and workgroup features help teams work together quickly and efficiently.

HD SaaS

HD SaaS® is an information technology platform built by HORTUS Digital and based on Microsoft® technologies. It offers a growing portfolio of Software as a Service IT solutions.

With HD SaaS you get:

- subscriptions to software applications
- no-hassle, outsourced system maintenance
- over-the-Internet software delivery
- very short set-up times (5 minutes to 3 days depending on service)
- pay-per-use
- 1 month minimum contract period
- higher affordability than traditional on-premise software
- modular, infinitely scalable functionality
- flexibility to add and remove users

HD SaaS applications available with HD SaaS | Enterprise Desktop

- HD SaaS® | Microsoft Dynamics® NAV
- HD SaaS® | Microsoft Dynamics® AX
- HD SaaS® | Microsoft Dynamics® CRM
- HD SaaS® | Microsoft® Exchange
- HD SaaS® | Microsoft® Office
- HD SaaS® | Microsoft® OCS
- HD SaaS® | Microsoft® SharePoint®
- HD SaaS® | WorkBook
- HD SaaS® | Scribe™
- HD SaaS® | BI4Dynamics®
- HD SaaS® | HD Fleet Management
- HD SaaS® | Elva DMS
- HD SaaS services for Infrastructure Optimization
- etc.
