

do IT differently!

HD SaaS™ | Microsoft Dynamics® NAV

HD SaaS | Microsoft Dynamics NAV is an enterprise resource planning (ERP) solution for small and midsize companies. It is a full accounting suite for management of assets, warehouse, sales, purchases and more. Built on Microsoft Dynamics® NAV ERP system, it is available on demand on HD SaaS, a modern Software as a Service (SaaS) platform created by HORTUS Digital.

More than one million users have used Microsoft Dynamics NAV to simplify and streamline their highly specialized business processes. Today it is available in 28 languages, has localizations for 42 countries and a wide vendor and partner network worldwide—now and in the future.

HD SaaS | Microsoft Dynamics NAV is a unique offer with unparalleled capabilities—a leading ERP solution hosted and maintained off-site. Gain immediate competitive advantage with lower implementation risk, time and cost!

User-friendly, quality ERP

HD SaaS | Microsoft Dynamics NAV collects your business processes into one integrated system. With close visual and functional ties to Microsoft® operating systems and Microsoft Office, it is easy to learn, simple to use and quick to implement.

Innovative solution

Built with the latest Microsoft technologies, **HD SaaS | Microsoft Dynamics NAV** is integration-friendly with many internal and external systems, as well as easily combined with other solutions offered on the HD SaaS platform. Clients can start with as little as one user and a set of modules and change components, upscale or downscale at any time!

Faster time to production

Without the time and technical issues associated with the installation and configuration of data center appliances, hardware servers, platform software and related computing hardware, ERP system implementations achieve a jump-start and a decreased implementation period.

HD SaaS | Microsoft Dynamics NAV

do IT differently!

Streamline business processes

Connect your entire supply chain in a productive, fast-moving flow to improve customer satisfaction, help streamline manufacturing and reduce the cost of doing business.

Provide information companywide

Make complete, current financial information and reports available to everybody who needs that information to perform business planning and realize regulatory compliance.

Reduce manual work

Simplify and automate routine and repetitious functions so that your employees can focus on more critical tasks. Fulfill the potential and increase the loyalty of your workforce while minimizing the cost and complexity of administering salaries, benefits, recruiting, and performance management.

Improve productivity

Accomplish project goals and achieve outstanding results within budget, on time, and with excellent resource efficiency.

Provide business intelligence

Look deeper into key performance factors—and pinpoint your most profitable customers, most efficient vendors, and potential issues within your organization that require swift action.

Ironically, the economic downturn clearly showed that SaaS ERP software applications provided businesses and customers with a much needed affordable ERP software alternative.

Mark Jeffrey, ERP.com (March 2010)

Decrease implementation risk

Implementing a SaaS ERP entails lower failure risk due to taking the hardware and software installation out of the equation, as well as decreasing the overall project implementation time. No need for components such as specific databases, security and maintenance tools, operating systems means lower probability of delay risks.

Need an industry solution?

Meet the unique needs of your industry with specialized functionality tailored to your vertical industry business processes.

HD SaaS offers vertical industry extensions for the ERP and CRM systems. We have several solutions for automotive, transportation and logistics industry: systems for fleet management, dealership management and service workshop management.

The HD SaaS team is always on the lookout for new solutions for different industry needs.

HD SaaS

The HD SaaS brand represents a portfolio of Software as a Service IT solutions available from the SaaS solution delivery platform offered by HORTUS Digital and based on Microsoft technologies.

With HD SaaS you get:

- / subscriptions to software applications
- / system maintenance outsourcing
- / over-the-Internet software delivery
- / very short set-up times
- / pay-per-use
- / 1 month minimum contract period
- / greater affordability than traditional on-premise software
- / modular functionality
- / flexibility to add and remove users
- / unparallel integration opportunities
