HD SaaS® | Scribe™ Migration

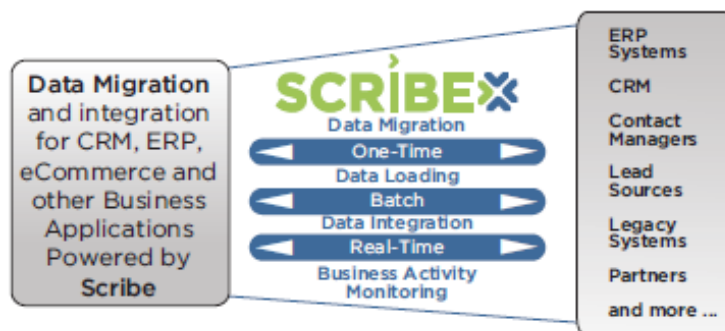

The Importance of Data Migration

Data migration is a key component to consider when adopting any new software, changing or merging computer systems. Although it is natural to think that any two systems which maintain the same sort of data must easily map information from one system to the other, this is rarely the case. Migration is extremely time-consuming, costly, and does not guarantee efficient use of IT resources involved in the project.

To ensure fast, efficient and affordable migration projects, a unique on-demand migration solution has been developed.

HD SaaS® | Scribe™ Migration

The HD SaaS | Scribe Migration IT service presents Scribe™—powerful business data migration software, now available from HD SaaS, the innovative Software as a Service solution delivery platform. This solution makes data migration as easy as possible by providing existing templates and configurable software that empower customers to quickly and seamlessly migrate data for either one-time migration project or ongoing data migration, without having to write a single line of code.

Software as a service

HD SaaS is an on-demand service hosting platform that gives customers access to enterprise-grade IT with zero investments in technology acquisition. Instead, it offers renting the necessary software, delivered over the Internet as a monthly service.

Faster migration. Guaranteed

The built-in logics of HD SaaS | Scribe Migration allows to design, map and perform data exports and imports in an intuitive, user-friendly interface compatible with most types of applications and databases. Scribe has been specifically designed to support the effective deployment of a number of market leading business applications or SaaS platforms, including but not limited to Microsoft Dynamics® CRM, Microsoft Dynamics® CRM Online, Microsoft Dynamics® GP, Microsoft Dynamics® NAV, Microsoft Dynamics® AX, Salesforce.com®, and SalesLogix®. Many deployment-ready templates are available, which considerably decreases migration time.

Efficiency and affordability

With HD SaaS | Scribe Migration, customers use the solution for the time of migration and avoid buying software and hardware that would become obsolete after the project. Any deployment size is possible, from small initiatives to large enterprise projects.

Do-it-yourself or trust professionals!

Subscribe to the solution and perform migration in-house or use HD SaaS Professional Services for an even faster progress! Contact us for more information: sales@hdsaa.com.

- ✓ **Outstanding usability** – avoid programming and empower your business people to work with Scribe!
- ✓ **Valued partnership** – available and affordable for companies big and small. Contact us for a competitive integration offer!

Solution Advantages

Adaptability out of the box

Scribe's unique template model provides "out of the box" functionality, built over its industry leading Scribe tool.

Phased rollout

This component architecture also enables customers to implement the template in phases or pick and choose the elements of the solution that they require. This modularity enables customers to implement the template "right-sized" to their exact needs.

Partner competence

Since Scribe products represent the general integration tool for hundreds of Microsoft Dynamics and other solution partners, there is no shortage of resources to help customers customize the template for their business and carry out an effective migration.

How to buy

HD SaaS services are available to customers through our valued HD SaaS Partners' network.

HD SaaS Partner

HD SaaS offers innovative, secure solutions worldwide, brought to customer by partners with local knowledge and implementation expertise. Contact us for information on partners in your area!

Your current partner

Refer your current business application implementation partner to the HD SaaS Partnership program and obtain HD SaaS solutions from a familiar business partner!

Scribe

Scribe is the core technology product that allows for data mapping and data management. This powerful yet flexible tool incorporates the essential building blocks to support a wide range of integration and migration requirements for enterprises of all sizes.

It enables customers to quickly and seamlessly migrate their mission critical applications to other applications and data stores in the enterprise. Utilizing a unique and open template model, Scribe allows the quick and efficient configuration of any data integration or migration to meet their specific needs, all without additional programming.
